PROJECTS

E-commerce tech-based Website

Languages used: HTML, CSS, Bootstrap, JavaScript, MySQL, and PHP.

Developed a robust e-commerce technology website from the ground up for the Database lab project. Implemented a seamless checkout process for customers, ensuring a smooth user experience. Integrated email notifications upon checkout to keep customers informed and engaged. Additionally, implemented a secure and user-friendly admin panel for efficient management of the website's content and orders.

Credit Card Website

Languages used: HTML, CSS, Bootstrap, and JavaScript.

Developed an all-device responsive website for a credit/debit card company.

Textify (Text Editor App)

Languages used: Java

Developed a Java-based text editor application that encompasses a wide range of features. This includes file management functionalities such as creating new files and opening existing ones, as well as text manipulation capabilities like cut, copy, and paste using a stack data structure. Additionally, the editor offers tools for find, replace, delete, bold, and italic formatting, and allows users to customize font size, color, themes, and many more.
